Proceedings
Proceedings of the Applied Networking Research Workshop 2021 are available from the ACM Digital Library.

All session are recorded, and recordings will be made available on YouTube after the workshop.
Note Well – Intellectual Property

The IRTF intellectual property rights disclosure rules (the “Note Well”) do not apply to contributions made to the ACM/IRTF Applied Networking Research Workshop.
Note Well – Audio and Video Recordings

The IRTF routinely makes recordings of online and in-person meetings, including audio, video and photographs, and publishes those recordings online.

If you participate in person and choose not to wear a red “do-not-photograph” lanyard, then you consent to appear in such recordings, and if you speak at a microphone, appear on a panel, or carry out an official duty as a member of IRTF leadership then you consent to appearing in recordings of you at that time.

If you participate online, and turn on your camera and/or microphone, then you consent to appear in such recordings.
As a participant in, or attendee to, any IRTF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.

Personal information that you provide to IRTF will be handled in accordance with the Privacy Policy at https://www.ietf.org/privacy-policy/

As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (https://www.ietf.org/contact/ombudsteam/) if you have questions or concerns about this.

See RFC 7154 (Code of Conduct) and RFC 7776 (Anti-Harassment Procedures), which also apply to IRTF.
Notes on Meetecho

• Presentation videos are pre-recorded, so we will take questions at the end of each presentation (5-min slot)

• Each session end with a 15-min panel for Q&A with all authors presenting in a session

• To ask a question, enter the queue (mic + hand logo), then the session chair will call you out and enable your audio!

ANRW’21 Program Overview

Monday, July 26, 2021 19:00-21:00 UTC (120 min)
  19:00-20:15 UTC: New Internet Protocols (chair: Anna Brunstrom)
  20:15-21:00 UTC: Practical Congestion Control (chair: Theresa Enghardt)

Tuesday, July 27, 2021 19:00-21:00 UTC (120min)
  19:00-19:45 UTC: Interconnection and Routing (chair: Amreesh Phokeer)
  19:45-21:00 UTC: Monitoring Internet Traffic (chair: Edmundo de Souza e Silva)

Wednesday, July 28, 2021 19:00-21:00 UTC (120min)
  19:00-20:00 UTC: DNS and Privacy (chair: Nick Feamster)
  20:00-21:00 UTC: Applications and Specifications (chair: Andra Lutu)
Session 1: New Internet Protocols

- **Adaptive Cheapest Path First Scheduling in a Transport-Layer Multi-Path Tunnel Context**
  *Marcus Pieska*, Anna Brunstrom, Andreas Kassler, Markus Amend, and Alexander Rabitsch

- **Leveraging the 0-RTT Convert Protocol to improve Wi-Fi/Cellular convergence**
  *Matthieu Baerts*, Nicolas Keukeleire, and Olivier Bonaventure

- **Cooperative Performance Enhancement Using QUIC Tunneling in 5G Cellular Networks**
  *Zsolt Krámer*, Mirja Kühlewind, Marcus Ihlar, and Attila Mihály
Session 2: Practical Congestion Control

• CCID5: An implementation of the BBR Congestion Control algorithm for DCCP and its impact over multi-path scenarios
  Nathalie Romo Moreno, Markus Amend, Anna Brunstrom, Andreas Kassler, and Veselin Rakocevic

• Toward greater scavenger congestion control deployment: implementations and interfaces
  Tong Meng, Christopher Cai, Brighten Godfrey, and Michael Schapira
Session 3: Interconnection and Routing

• **Hunting BGP Zombies in the Wild**
  Porapat Ongkanchana, *Romain Fontugne*, Hiroshi Esaki, Job Snijders, Emile Aben

• **Meta-Peering: Towards Automated ISP Peer Selection**
  Prasun Kanti Dey, Shahzeb Mustafa, and Murat Yuksel
Session 4: Monitoring Internet Traffic

• Towards Cross-Layer Telemetry
  *Justin Iurman*, Frank Brockners, and Benoit Donnet

• L, Q, R, and T - Which Spin Bit Cousin is here to stay?
  *Ike Kunze*, Jan Rüth, and Klaus Wehrle

• Detecting Consumer IoT Devices Through the Lens of an ISP
  *Said Jawad Saidi*, Anna Maria Mandalari, Hamed Haddadi, Daniel J. Dubois, David Choffnes, Georgios Smaragdakis, and Anja Feldmann

• On the Evolution of Internet Flow Characteristics
  *Simon Bauer*, Benedikt Jaeger, Fabian Helfert, Philipe Barias, and Georg Carle
Session 5: DNS and Privacy

• Encryption without Centralization: Distributing DNS Queries Across Recursive Resolvers
  Austin Hounsel, Paul Schmitt, Kevin Borgolte, and Nick Feamster

• Institutional Privacy Risks in Sharing DNS Data
  Basileal Imana, Aleksandra Korolova, and John Heidemann

• DNS over TCP Considered Vulnerable
  Tianxiang Dai, Haya Shulman, and Michael Waidner
Session 6: Applications and Specifications

• Tools for Disambiguating RFCs
  Jane Yen, Ramesh Govindan, and Barath Raghavan

• Manus Manum Lavat: Media Clients and Servers Cooperating with Common Media Client/Server Data
  Ali C. Begen
