

Low-Carb BGP: A Carbon-Aware Inter-Domain Routing Extension to BGP

Edwin Sutherland - PhD Student

Iain Phillips - Supervisor

1. Motivation

“ **4%**

*of global CO₂ emissions
is by ICT Industry.*

Key Idea

To incentivise ISPs by prioritising routing through greener ISPs, thereby enabling them to achieve higher profitability.

2. Measuring ISP Greenness

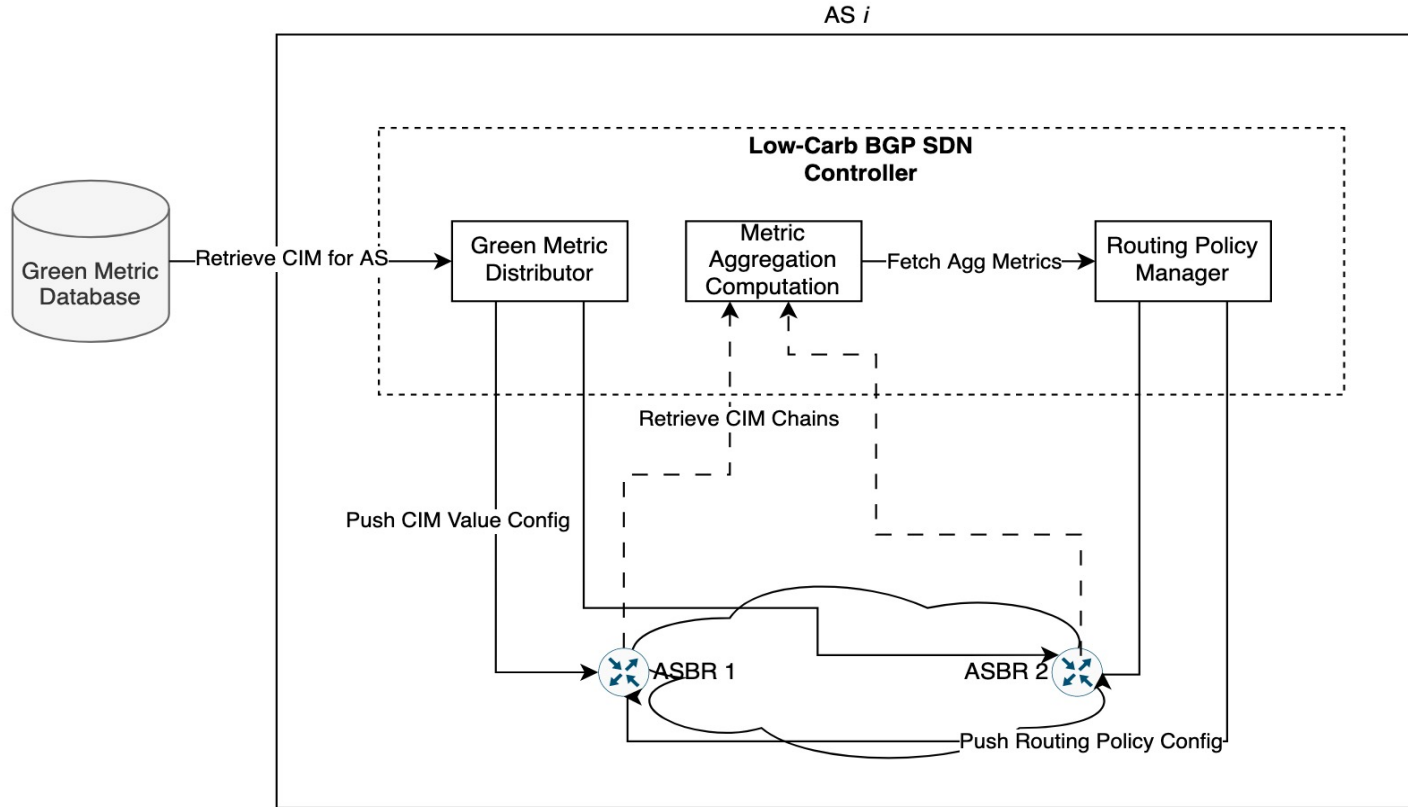

Carbon Intensity
Carbon Performance Rating

3. Low-Carb BGP

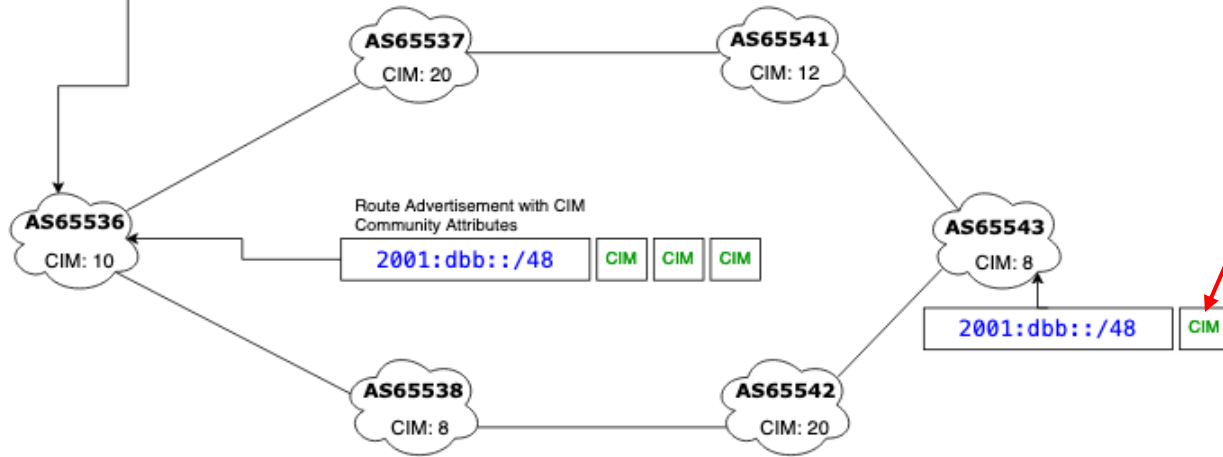

Low-Carb BGP (LCB) System Architecture

Dissemination of Green Metric

```
BGP_RIB  
> 2001:dbb::/48  
  
PATH 1:  
ASPATH: 65537 65541 65543  
CIM_ExComm: 65537:20 65541:12 65543:8  
  
PATH 2:  
ASPATH: 65538 65542 65543  
CIM_ExComm: 65538:8 65542:20 65543:8
```

CIM Chain

Carbon Intensity Metric (CIM)

Green Metric Aggregation

- TCIM per prefix
- MCIM per prefix
- HCIM per prefix
- Median TCIM per neighbour

Policy Formulation

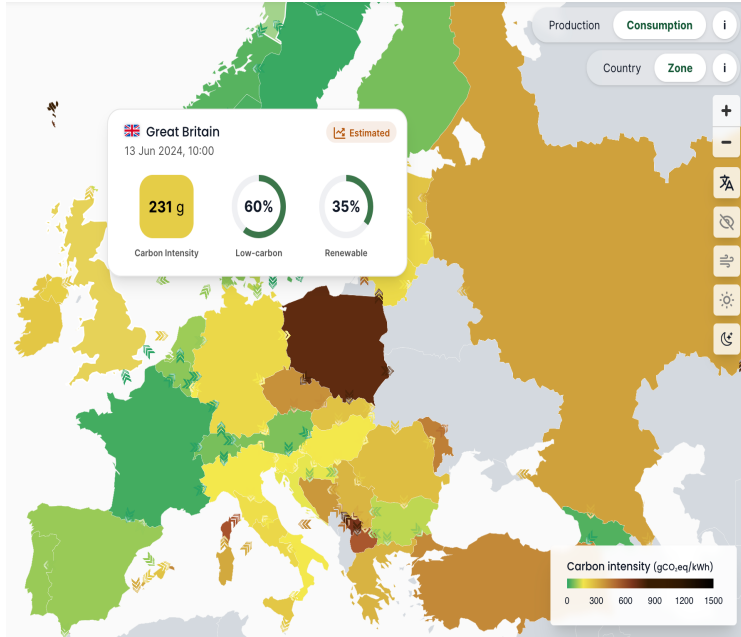

- Greenest Path First (GPF)
- TCIM Budget
- Multi-objective optimisation

4. Test Bed

Test Bed Setup

ElectricityMaps.com

Test Goals

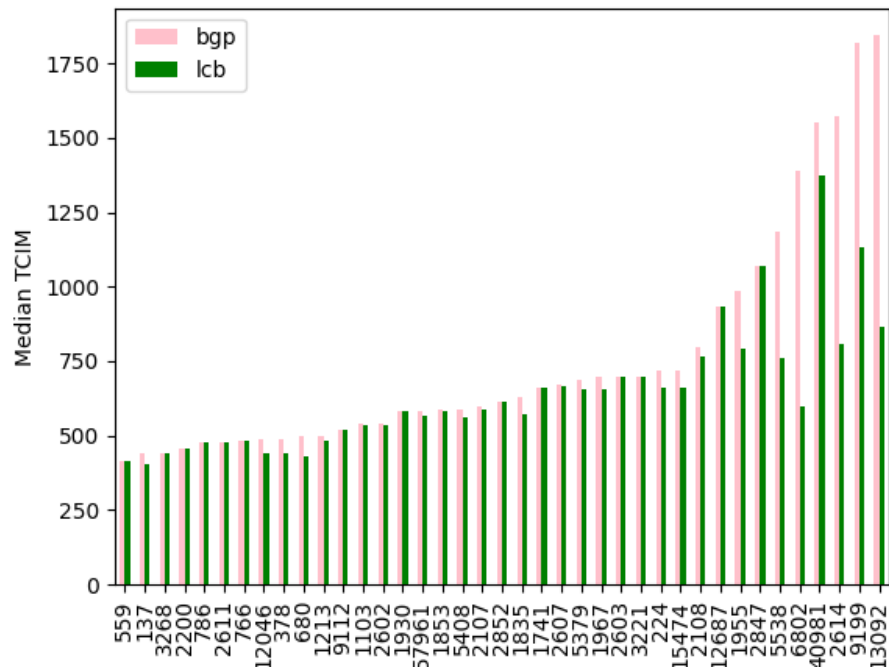

- Calculate TCIM per prefix
- Change routing policy to GPF
- Compare results between BGP and LCB

5. Results

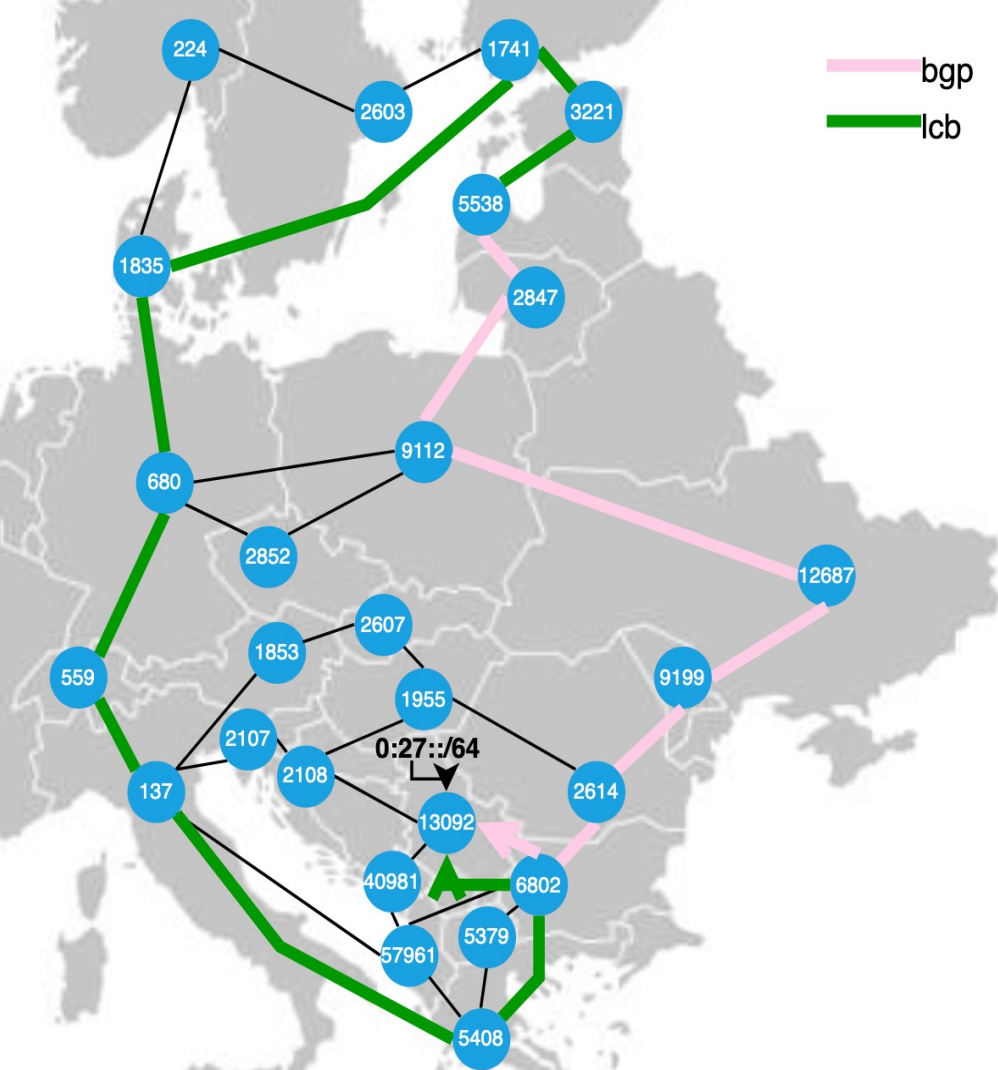

TCIM and Hop Count Analysis

Median TCIM Comparison

Hop Count Comparison

Best Case Example

AS 5538 -> AS 13092

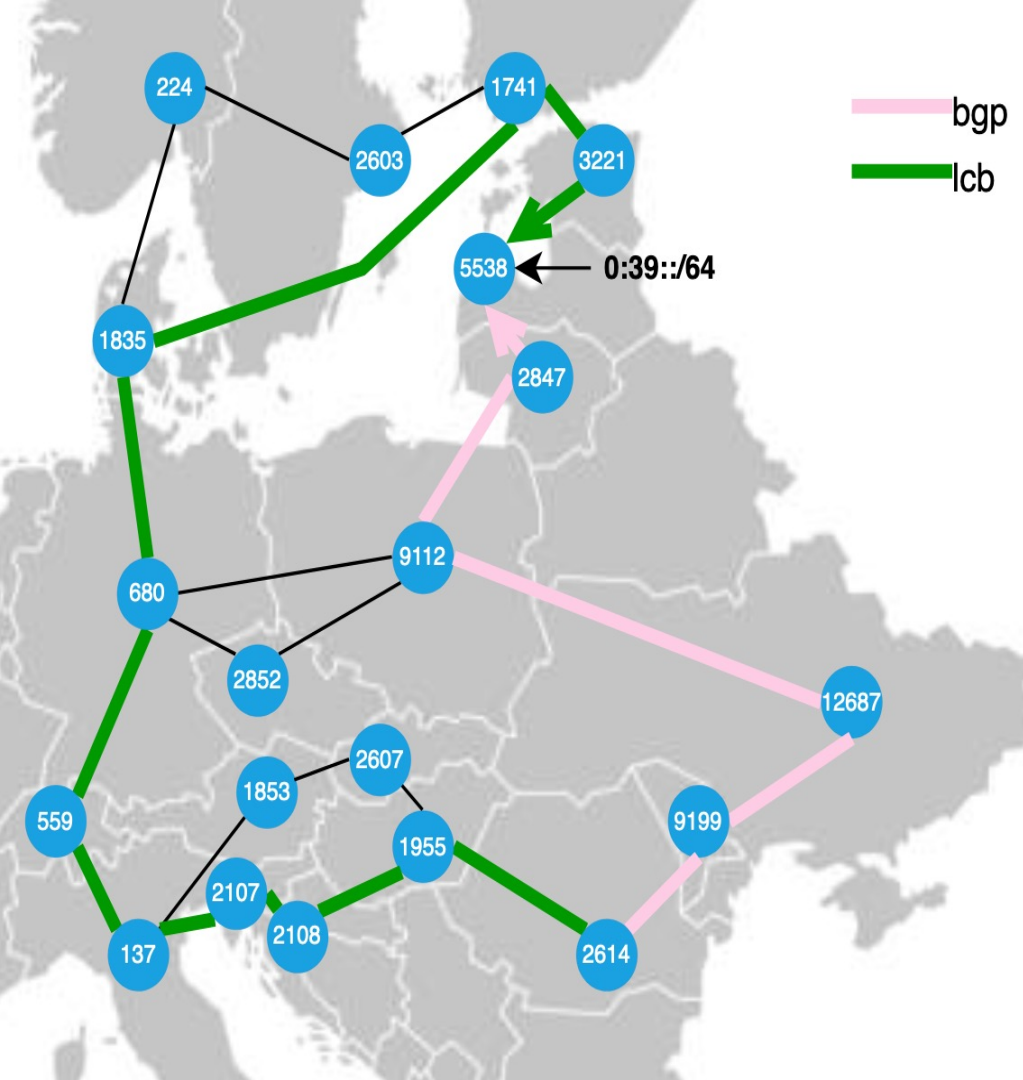

GPF exchanges 2 extra hops for **67%** reduction in TCIM

Worst Case Example

●—○ AS 2614 -> AS 5538

●—○ GPF exchanges **5** extra hops for **37%** reduction in TCIM

Top Ten Transit AS Ranking

Rank	ASN	BGP		ASN	LCB	
		CIM	Transits		CIM	Transits
1	680	194	594	137	183	634
2	137	183	529	680	194	594
3	559	85	411	559	85	477
4	2200	27	376	2200	27	467
5	1835	89	320	1835	89	367
6	9112	551	245	5408	98	233
7	57961	1000	174	9112	551	137
8	6802	270	151	1853	89	135
9	2614	276	132	1741	38	131
10	5408	98	126	2107	206	124

20%

Reduction in carbon footprint with LCB

6. Conclusion and Future work

Conclusion

- LCB overlaps Green economy with Internet routing
- LCB is adoptable by current inter-domain routing paradigm

Future Work

- Experiment with more AS-level topologies
- Experiment with different Green metric types and formats.
- Research multi-objective optimisation with LCB

Thanks!
